

OPEN SOURCE SOLUTIONS ARE

THE KEY-KATALYSTS

FOR SUCCESSFUL DIGITAL TRANSFORMATION

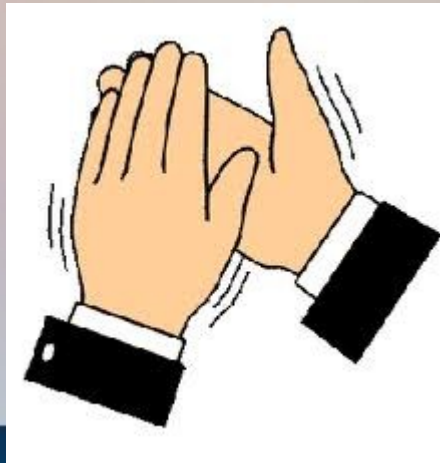

By:

Frans van der Star

Welcome all of you

Dear Guests

and honored Guests

Imagine.....

You take money from ATM abroad

You book a flight

you can reach whole world by <http://>

How.....???

On Open Source

**Linux-
servers**

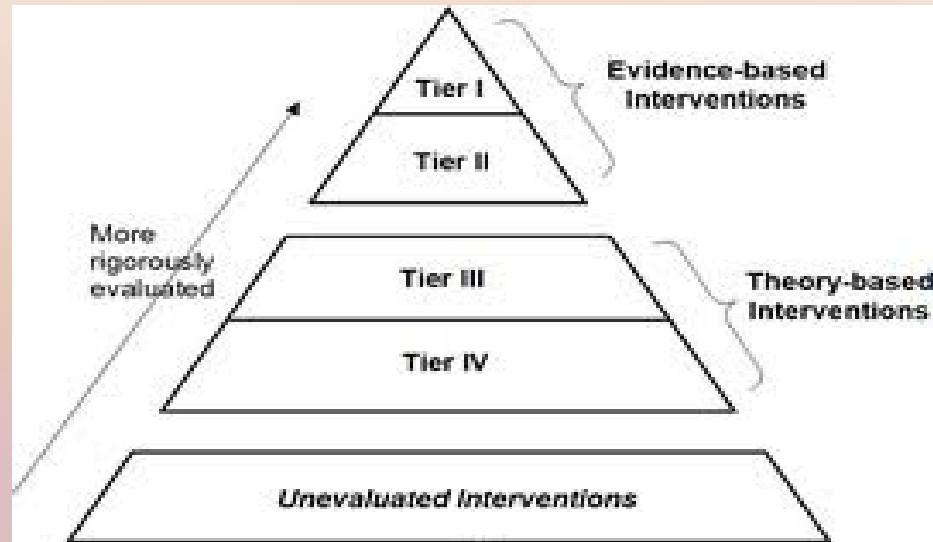

SOURCE WIKIPEDIA:

Linux distributions are also commonly used as operating systems for supercomputers: since November 2010, out of the top 500 systems, 459 (91.8%) run a Linux distribution.[79] Linux was also selected as the operating system for the world's most powerful supercomputer, IBM's Sequoia which

will become operational in **2011.[80]**

With permission now we can reach the empirical

convention:

Professional =

Only

Cheap

Bad quality

Why stakeholders should use

- Very budget friendly (not always for free)
- Very stable
- Interoperability is perfect
- Very flexible (especially for the future)
- Security (almost zero cyber threats)
- Excellent feedback for users through communities

These Open Source communities provide opportunities for the young generation for now and the future

Students who want to share with others round the world knowledge And expertise in excellent facilitated communities like Postgres (database), LedgerSMB (ERP) and Joomla (CMS)

After successfully graduated they can start own consultancy/ Engineering firm and continue with sharing knowledge through The Open Source Channels or even establish joint ventures.

They can.....

There is another advantage

for:

and

Public

Private

← **sector** →

Not dependant from proprietary software companies, which offer software in obligatory Packages like:

- Siebel, Oracle and Windows for Banking
- Navision and Windows (ERP-system)
- Postbooks and Windows-server

**Conclusion for a successful digital transformation is
Integral implementation of Open Source software essential**

Resume

Independant

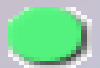

Proportional savings on budget

Flexible for changes future_r

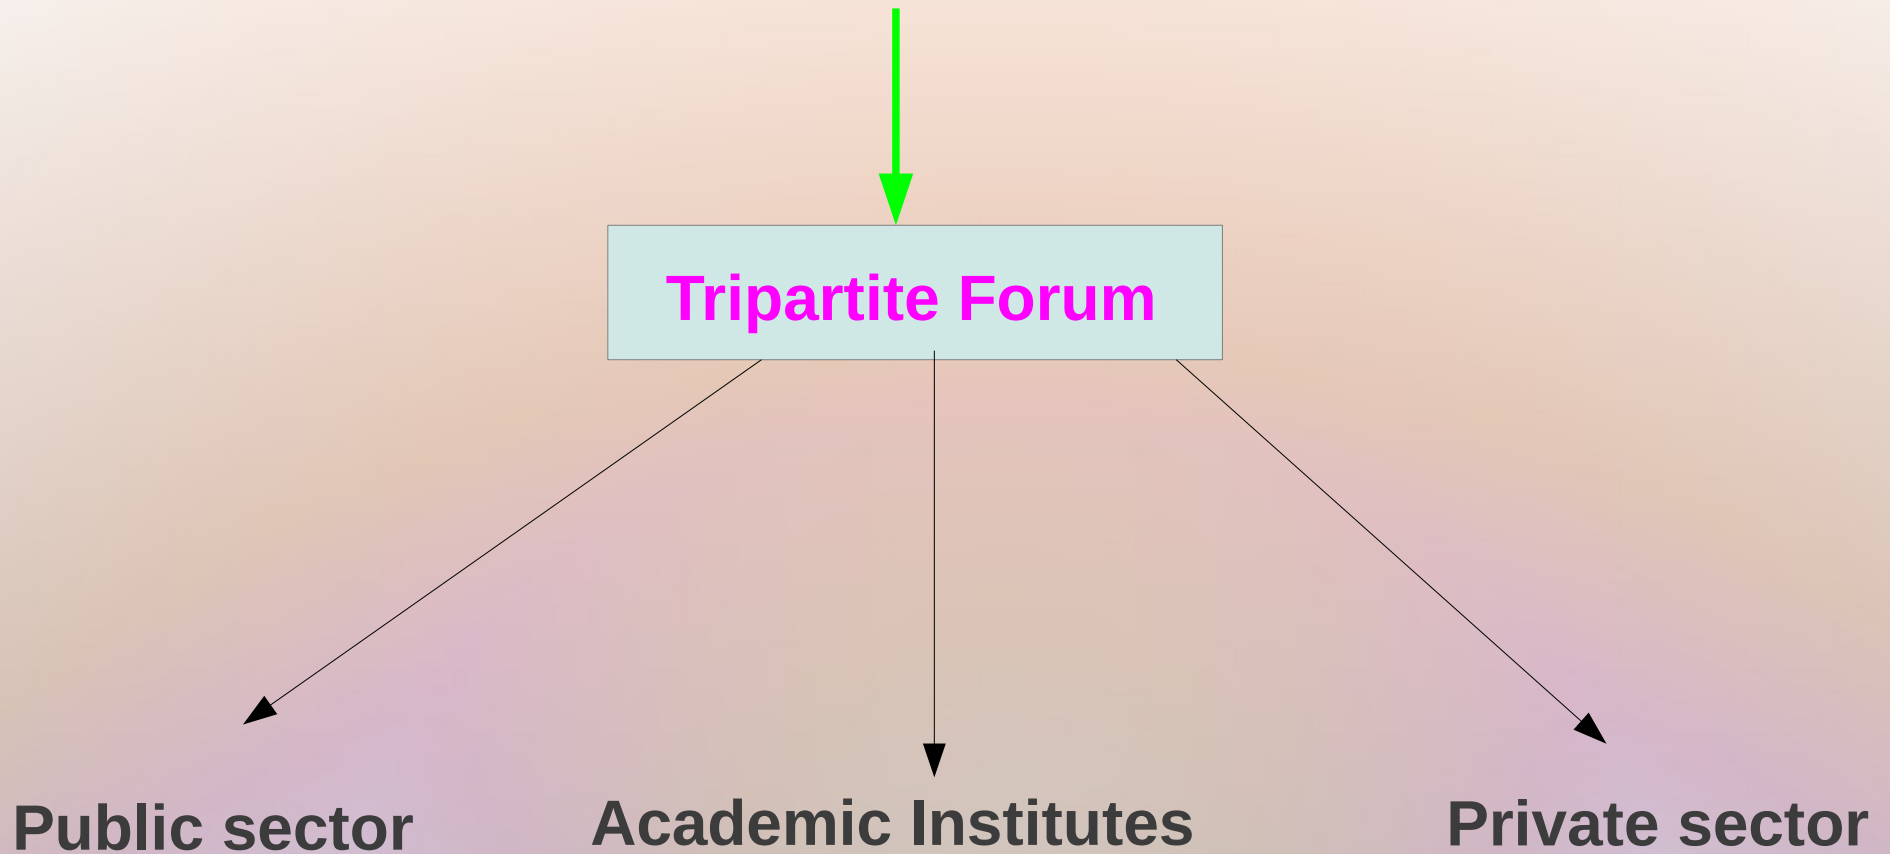

Excellent for huge databases

great opportunities graduates

MODEL INITIATING THIS IMPLEMENTATION:

In order to reach consensus:

- Quality standards software; Malaysian branding
- Exchange knowledge and expertise
- Interoperability
- Research & Development customizing, modification software
- Participation international software-development

And over half a decade.....

Klang Valley ↑

Becomes.....

Linux Valley ↑

Thank you
